For more information visit https://covid.iu.edu/learning-modes/index.html					EVOLUTION AND ANALYSIS OF BRAIN-BODY-ENVIRONMENT SYSTEMS Notions of embodiment, situatedness and dynamics are becoming increasingly important in cognitive science, converging on a view in which an agent's behavior and cognition are seen not merely as products of its brain alone, but rather as arising from the interaction between the agent's nervous system, body and environment. In order to evaluate the significance of these ideas, this course will examine the construction and analysis of models of complete brain-body-environment systems, with a particular emphasis on the use of tools from complex systems (including evolutionary algorithms, dynamical systems theory and information theory) to study how such coupled systems work. Behaviors to be examined range from basic motor behavior and sensorimotor learning to categorical perception, selective attention, agency detection and communication. We will also examine some of the broader implications of the brain-body-environment perspective for thinking about brain and behavior. Above class meets In Person. VT: BRAND MANAGEMENT PRACTICUM	12359	PERM	04:45P-06:00P	MW	BH 142	King K
This practicum is geared toward students interested in a career in brand management or as a creative service provider for brands. The course offers students the opportunity to work on a real brand (preferably national) with teammates who offer a variety of expertise including strategy, design, and media. Students from Kelley School of Business, The Media School, and the Eskenazi School of Art, Architecture + Design are encouraged to enroll. This team composition mimics what students will experience in their future jobs and hence, prepares them to see a business problem from a different lens and appreciate the diversity of views. This course provides students a unique learning experience of applying the synergy of different talents, knowledge, skills, and perspectives to create effective strategies, tactics, and deliverables for a brand that can be implemented in the real world. Application is required for enrollment: https://forms.gle/RQAuJheAotJ429B89 Above class meets In Person. For more information visit https://covid.iu.edu/learning-modes/index.html

VT: PREPARING FOR LIFE AS A TEACHE

11131 ARR ARR WB WEB Allen C

In this course, students will begin to explore the personal,

institutional, political, and cultural forces that impact the

lived experience of being a professional teacher

Possible key questions for reflection include: How does

self-knowledge help teachers positively shape their

professional lives? How does school culture shape the

day-to-day life of teachers and how do you identify a school

culture that is right for you? How does the current emphasis

on standardized testing impact the life of a teacher and how

can teachers positively respond to this? What does it mean to

be a "role model" and what are the challenges and

opportunities presented by this social role? What does

community mean and how are teachers participants in and

facilitators of positive community?

Exploration of these questions will occur through student

centered, hands-on, and interactive classroom activities

VT: ETHICS & MORALITY PUBLIC AFFRS 33368 RSTR 02:00P-04:00P TWR WB WEB Bower-Bir J	
TOPIC: Ethics and Morality in Public Affairs Description: This course will examine the normative concerns that drive politics and public policy. These concerns tend to fall under the heading of "morals", which are difficult to measure and therefore given short shrift by social scientists. Recent investigations, however, suggest that the normative motivations driving human behavior and policy are well within the realm of empirical research and, far from being metaphysical, are entirely natural and open to scientific scrutiny. (But don't fret! There remains ample room for mystical, transcendental, and metaphysical approaches to these questions.) Special attention will be paid to two key concepts: justice and deservingsness. Readings, lectures, and discussions will draw on--and expose the overlap of--moral philosophy, institutional economics, public opinion, and post-positivist policy research. TOPIC: Introduction to Survey Research Above class meets with SPEA-V 550 According to Jonathan Rosenberg, former senior vice president of Google, Data is the sword of the 21st century, those who wield it well, the Samurai. In recent decades, survey data have become powerful swords that inform government policy making, business and nonprofit decision-making, political campaigns, legal decisions, and academic research in many fields of study. This course will give you the skills that you will need to harness the power of surveys: How do I select a sample? How do I design survey questions? How do I collect the data? As part of the class, students will be exposed to many real world survey examples. This is a rigorous, upper-level undergraduate class designed for those with an interest in research methods.
