 L 211 : P - BIOL-H 111 or BIOL-L 112 or equivalent; and  
 CHEM-C 117, CHEM-S 117, or CHEM-J 117

Credit given for only one of the following: BIOL-L 211 or S 211

The structure of the above class is blended/flipped relative that of a traditional class. Students are expected to invest time during the week watching lecture videos [~ 2-3 hours], completing the assigned readings, starting to learn new vocabulary and complete pre-class assignments [~ 2 -3 hours] before coming to class. Submissions that will be required at regular intervals during the week (example Monday lecture assignment, Wednesday Lecture assignment) before class meets on Friday. Seek out assistance immediately when you need it during the week. Friday classes are active learning classes where students will engage in collaborative, active, and inquiry-based activities. These are designed to deepen understanding of course topics, practice disciplinary thinking and apply the material of the week to real world scenarios (drug design, scientific methods, and experimental strategies). Students are expected to come to class prepared and ready to engage with their teams We will assume that you have read the material before class

All exams and quizzes will be administered during the discussion section. Students must register for one of the 2 discussion options

**CHEM-C 117 PRINC OF CHEM & BIOCHEM I (3 CR)**

This is an invitation only, small (50 students maximum) section of C117 that is intended for students who plan to continue to organic chemistry or other later courses in chemistry and would benefit from a smaller, more structured section. The course will use a specifications-based grading scheme in which students will get credit for showing mastery of core and advanced topics, and the final grade will be determined by the number of topics students master. Students will be asked to commit to being a part of a supportive and respectful learning community, to attending at least one office hour per week at any point that they are struggling, and to submitting work that accurately reflects their understanding of the material.

| CLSD 12843  | 09:15 A-10:30 A TR BH 018<br>EVOLUTION AND ANALYSIS OF BRAIN-BODY-ENVIRONMENT SYSTEMS<br>Notions of embodiment, situatedness and dynamics are becoming increasingly important in cognitive science, converging on a view in which an agent's behavior and cognition are seen not merely as products of its brain alone, but rather as arising from the interaction between the agent's nervous system, body and environment. In order to evaluate the significance of these ideas, this course will examine the construction and analysis of models of complete brain-body-environment systems, with a particular emphasis on the use of tools from complex systems (including evolutionary algorithms, dynamical systems theory and information theory) to study how such coupled systems work. Behaviors to be examined range from basic motor behavior and sensorimotor learning to categorical perception, selective attention, agency detection and communication. We will also examine some of the broader implications of the brain-body-environment perspective for thinking about brain and behavior.<br>Above class meets In Person. This is a 100% online class taught by IU Kokomo. No on-campus class meetings are required. A distance education fee may apply; check your campus bursar website for more information. If IU e-Texts are not used for this class, textbooks and other materials are available through your home campus bookstore.

This class is offered as part of a joint academic program. Please consult with your advisor to ensure this class will count toward your degree requirements.

**Criminal Justice-Coas (CJUS)****CJUS-P 100 INTRO TO CRIMINAL JUSTICE (3 CR)**

Above class is part of the "Transfer Indiana" (transferIN) Initiative.
